Using eFlyBook - TripBuilder

Starting TripBuilder

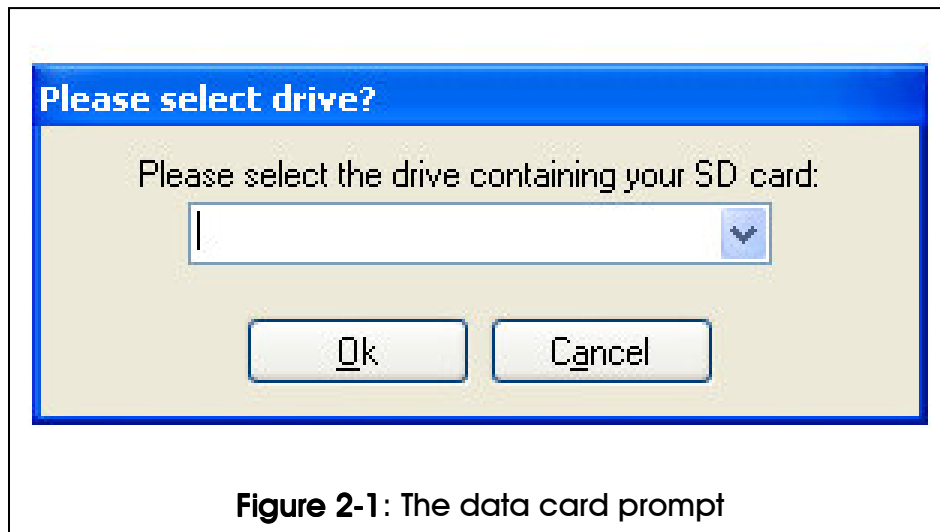

Starting the TripBuilder can be done 2 ways. First is by clicking the new "TripBuilder" button that is in the eFlyBook Internet Update Client

Or you may start TripBuilder thru the windows Programs listing.

To allow quick access to the latest cycle data, the TripBuilder requires access to the data storage card used by the eFlyBook. When the TripBuilder is started, you will be prompted for the drive letter of your eFlyBook data card, Please ensure that it has been inserted into your SD/Card reader.

When the application data has been loaded successfully it will show the main screen (shown in Figure 3-1)

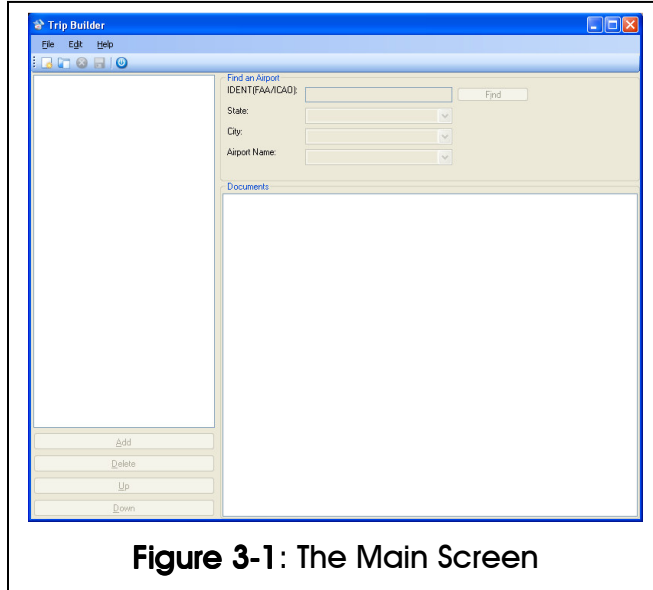

Figure 3-1: The Main Screen

Once loaded you will be able to create new trip documents and open/edit existing trip files.

Create a new Trip

Creating a new trip is comprised of three separate steps, first a new trip document needs to be created.

To create a new trip select **File->New (or Ctrl+N)**, you will be presented with the “Create a new Trip dialog” as shown in “Figure 3-2”.

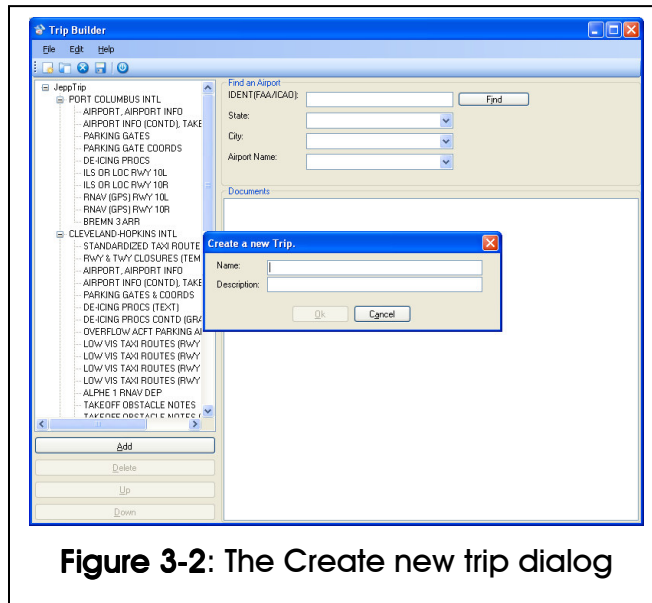

Figure 3-2: The Create new trip dialog

Fill the trip name and description fields and select **Ok**, the description data will be used to identify your trip on the eFlyBook.

Once the trip has been created, your will need to add legs (Airports) to your trip. To find an airport you may use either the Ident or State, City and Airport searches as shown in "Figure 3-4".

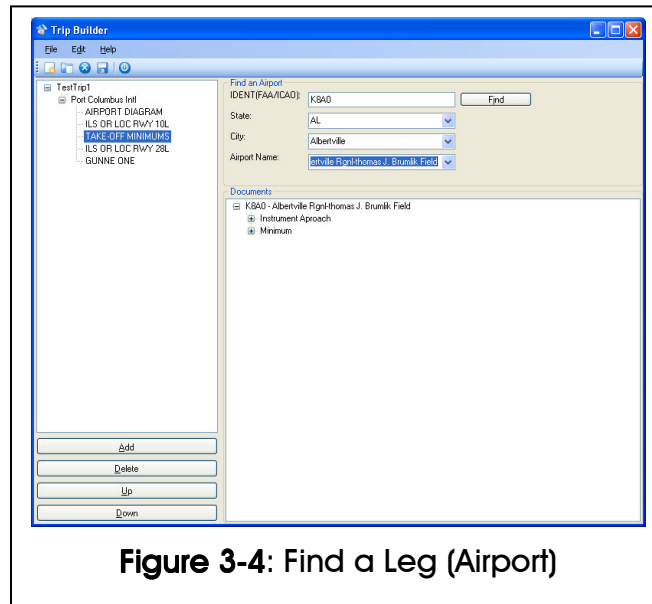

Figure 3-4: Find a Leg (Airport)

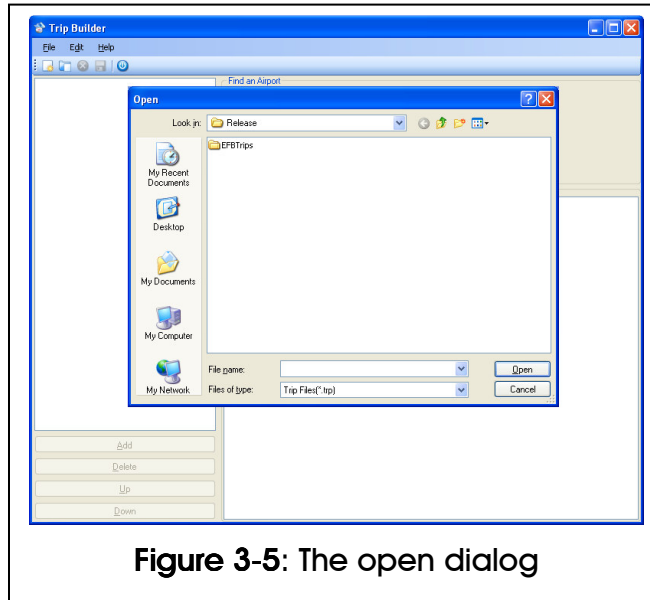

Enter the identifier and press **Enter** or click the **Find** button, if the airport is found the documents associated with the airport will be shown in the Documents list. Select the documents of interest by using your mouse and the **Ctrl** or **Shift** keys, do note the order in which the documents are selected will be the order in which they will be displayed in the trip. Once selected you add the documents to the trip by selecting the **Add** button.

Repeat these steps for more Legs (Documents), once complete you can store your trip by selecting **File->Save (Ctrl+S)**. Your trip is now ready for use on your eFlyBook.

Modifying a Trip

All your trip document templates are stored on your personal computer, within the EFBTrips folder.

To open a trip select **File->Open (Ctrl+O)**, you will be presented with the “Open dialog” as shown in “Figure 3-5”.

Once opened, your trip will be displayed in the trip list, use the **Delete**, **Add**, **Up** and **Down** buttons to modify the order of the Charts/Documents in your trip.

Both legs and documents can be moved and manipulated by selecting the said leg or document and using the above mentioned buttons to modify its position. To rename the trip select **Edit->Rename (Ctrl+R)** you will only be able to modify the description of the trip used for display on the eFlyBook.
